Risk Disclosure Notice

investments denominated in foreign currencies may diminish or increase due to changes in the rates of exchange.

- 9.2. Slippage occurs when the market moves suddenly in any direction, and is the difference between the expected price of a trade, and the price at which the trade was actually executed. The price is then said to have ‘slipped’ when the market has ‘gapped’ from one level to another. This applies in the event of either advantageous or disadvantageous price movements and can result in either losses (negative slippage) or gains (positive slippage).
- 9.3. Trading CFDs is only appropriate for those customers who fully understand the risks and have previous trading experience. If unsure, it is advisable to seek independent advice.

10. DERIVATIVES

- 10.1. Positions opened with us are not traded on any exchange. The prices and other conditions are set by us, subject to any obligations we have to provide best execution, to act reasonably and in accordance with our user agreement and with our order execution policy. Each CFD trade that you open through our Trading Platform results in you entering into a contract with us; these contracts can only be closed with us and are not transferrable to any other person.

11. NEED TO MONITOR POSITIONS

- 11.1. Because of the effect of leverage and the speed at which profits or losses can be incurred, it is important that you monitor your positions closely. It is your responsibility to monitor your trades at all times.
- 11.2. Markets are subject to many influences which may result in rapid price fluctuations. Because of market volatility, there is no CFD transaction available via our trading platform that can be considered “risk free”. Given the potential levels of volatility in markets, it is recommended that you closely monitor your transactions at all times. For example: the value of investments denominated in foreign currencies will be impacted by both changes in the rates of exchange and market movement.

12. OPERATIONAL RISKS

- 12.1. Operational risks with Plus500 on your computer are inherent in every CFD transaction. For example, disruptions in Plus500's operational processes such as communications, computers, computer or mobile networks or external events may lead to delays in the execution and settlement of a transaction. Plus500 does not accept or bear any liability whatsoever in relation to the operational processes of Plus500, except to the extent that it is caused by the fraud, negligence or dishonesty by Plus500.
